Winter Birding Locations

McDavitt and Admiral Roads — insect a large Black Spruce-Tamarack bog. Check for Great Gray Owls (year-round), Black-billed Woodpeckers, White-winged Crossbills (winter), Connecticut Warblers, and Yellow-bellied Flycatchers (Summer). Don’t miss the Admiral Road feeders in winter — the best spot in the state to see and photograph Boreal Chickadees (also Canada Jays, redpolls, and occasionally Pine Marten).

Stone Lake Road — Watch for Northern Hawk Owls, Great Gray Owls, and Northern Shrikes in winter. Summer breeders include LeConte’s Sparrow, Sedge Wren, Black-billed Cuckoo, and American Bittern. Yellow Rail has been recorded (very rare!). Scan the lake for Trumpeter Swans, loons, migrating waterfowl, and a possible Moose. Check the public landing in spring migration for warblers. Short-eared Owl possible spring and fall.

Listen and look for Boreal Chickadees, Canada Jays, and Great Gray Owls along the Arkola bog stretch. Make sure to stop by our huge feeding array at the Welcome Center — Pine Grosbeaks, Evening Grosbeaks, Common Redpolls, Hoary Redpolls (some years), and more. In summer, listen for Yellow-bellied Flycatchers and Connecticut Warblers.

The hayfields and meadows here are the year-round home of Black-billed Magpies and Sharp-tailed Grouse (the lek is 1.5 miles north of County Road 133 on the east side). In summer, look and listen for Bobolinks, LeConte’s Sparrow, Sedge Wren, and both species of meadowlark. Snow Buntings and an occasional Snowy Owl may visit in winter. Sandhill Cranes nest here.

Lake Nichols Road is a great place to look for Great Gray Owls at dawn and dusk year-round. Also winter finches, Ruffed Grouse, wolves, roadside wildflowers, and butterflies.

Spring/Summer Birding Locations

Hayfields, pastures, and meadows — great for LeConte’s Sparrow, Sedge Wren, Sandhill Crane, Black-billed Magpie, and Black-billed Cuckoo. The pastures at the intersection of Poplar Road and Arkola Avenue (County Road 52) are especially good for Upland Sandpipers, Bobolinks, and meadowlarks (Eastern and Western are possible). A grouse lek is at the southwest corner.

Huge wet willow flats. Listen for American Bittern, Snipe, Virginia Rail and Sora. Sandhill Cranes, moose, and wolves are possible.

Just a nice quiet back road to stop and bird in spring/summer. Deciduous woods, creeks.

Sharp-tailed Grouse lek — activity possible late winter to early May, peaking in April.

Feeding Station (please make a donation if there is a donation box)

Friends of Sax-Zim Bog’s Land Preserves: Yellow-bellied Bog, Boreal Chickadee Bog, Indian Pipe Bog, and East Stone Lake Bog

Avoid the north end of Stickney Road if possible. This is not a birder-friendly location.

Gas, Food, Restroom/Outhouse, Public Access
